

Andrews  University  
PROPOSED GATEWAY ENTRANCE

PREPARED BY THE DIVISION OF ARCHITECTURE

DECEMBER 14, 2006

## **University Gateway Entrance Master Plan**

### **Project Summary**

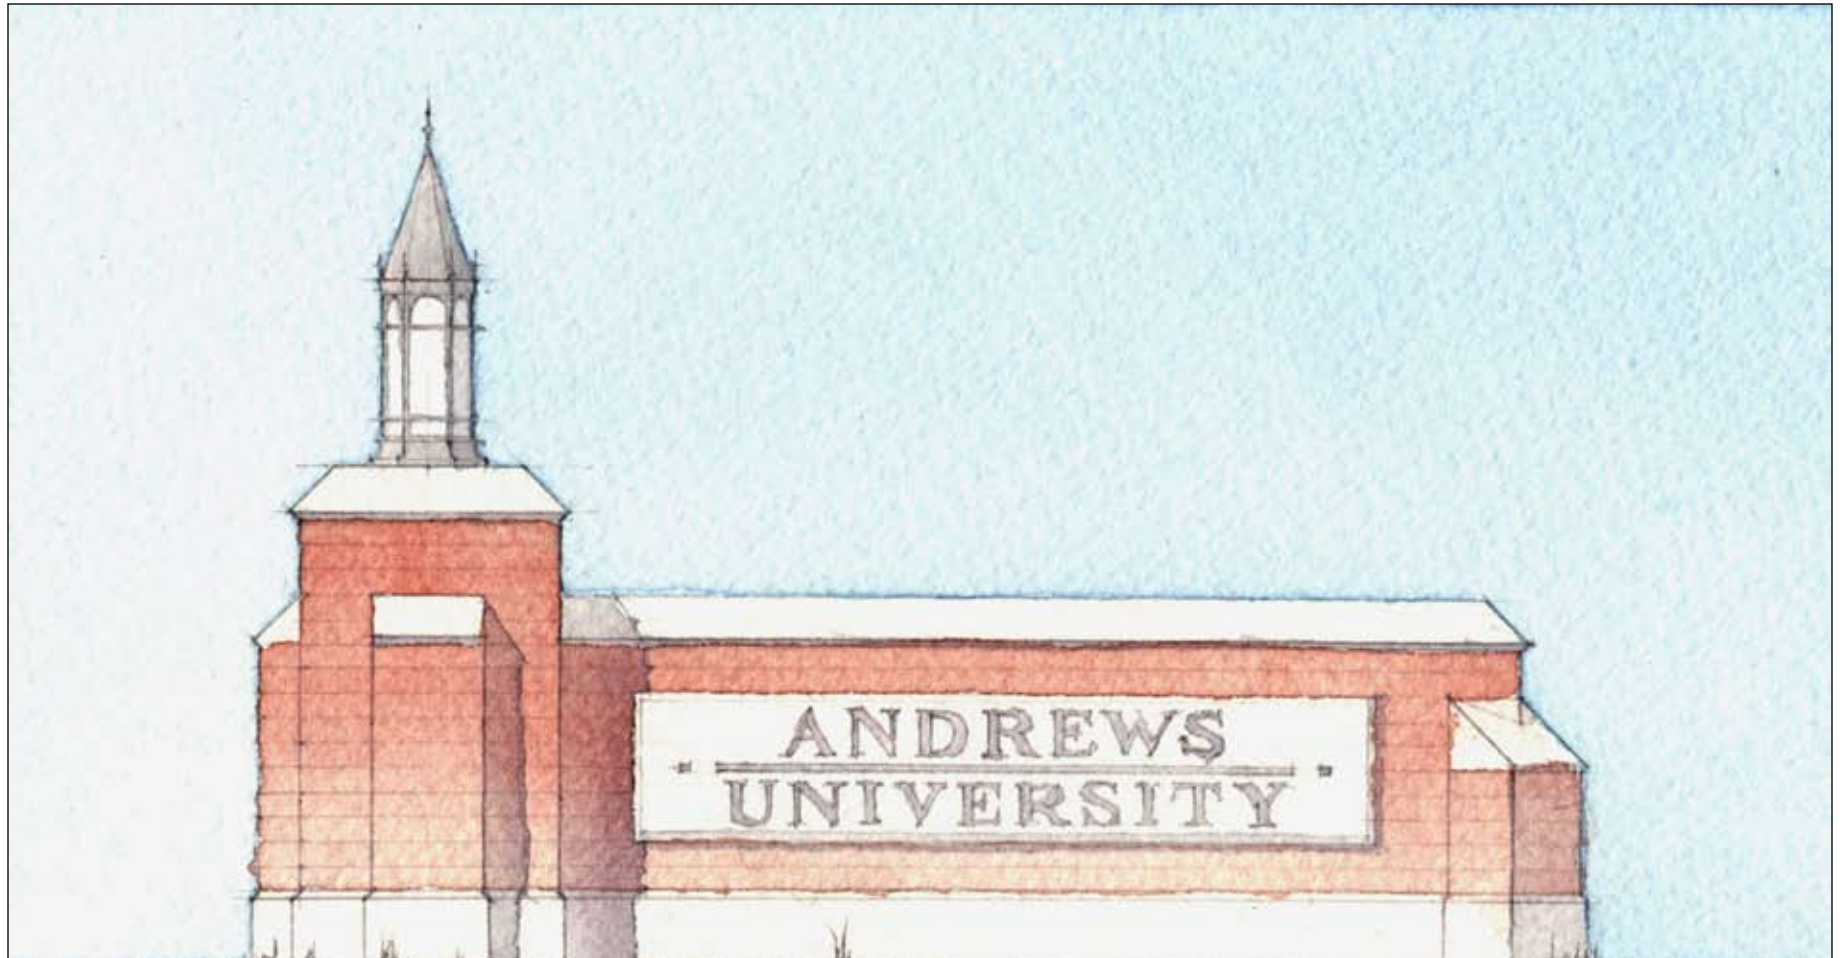

In harmony with the campus master plan, Andrews University is pursuing the construction of a new entrance to the main campus that will recapture its physical connection and visibility to the local community and provide a focal point for future campus development. The planned new campus entrance emphasizes the connection and movement of people by utilizing design elements to create spatial enclosure, vista, and sequence carrying the visual experience from Old US 31 to the main campus. To attain this goal, a project plan has been developed that would allow the University to pursue this impressive project over a period of time to better coordinate construction activities and phase the financial impact of such an undertaking.
